

Case Study

Riley Elementary School

Details

Location: Long Island, NY

Description: 1,500 square-feet of

Polyflor 2000 PUR

Flooring Choice:

Polyflor 2000 PUR Glenbeck and

Blossom

Project Needs

Wax-free flooring

Easy to clean

Easy to maintain

Simple to install

Project Benefits

Polish-free flooring

Colorful design

Elementary School Upgrades to Wax-Free Flooring

Riley Avenue Elementary School in Calverton, NY on eastern Long Island strives to provide the best learning environment for its students. As part of the Riverhead Central School District, one of the school's main goals is to maintain a modern and safe learning environment that helps students grow and learn. To support this, a 2011 Bond referendum was passed to renovate all of its current facilities. The administration also recognized the student's library was outdated and in need of an upgrade. The summer of 2013 presented the perfect opportunity to make the necessary upgrades to the library space.

The library at Riley Avenue Elementary required wax-free flooring that was easy-to-install and maintain, was abrasion resistant, and able

to withstand the abuse of 600 elementary-aged children on a daily basis. Working with Tracy Hansen from BBS Architects, the school installed Polyflor 2000 PUR, a high-quality, polish-free solid vinyl floor tile that is polyurethane reinforced and UV cured.

Polyflor PUR is part of an expansive product line offering from ECORE Commercial Flooring, a brand of ECORE, a company that transforms reclaimed waste into unique performing surfacing. The PUR family of products offers excellent durability, reliability, easy maintenance, and endless design possibilities. The lifelong polish-free maintenance regime of Polyflor PUR reduces maintenance costs by 48 percent over the 20+ year life of the product. Additionally, PUR

products are 100 percent recyclable and contain 25 percent recycled material.

The appearance of the 2000 PUR line features a sophisticated directional duotone and marbled decoration with marbled highlight. With its toughness, cleaning benefits, and stylish colors, the Polyflor PUR range of polish-free flooring makes it ideal for heavy traffic areas, such as commercial interiors, and busy healthcare and education applications. "We specified this product because of the ease of maintenance and its visual appeal," said Hansen. "The client is very happy with the product. The entire renovation has been a huge success within the school."
